

include/ttak/sync/sync.h

```
graph TD; A[include/ttak/sync/sync.h] --> B[pthread.h]; A --> C[stdint.h];
```

The diagram illustrates a header file dependency. At the top, a dark gray box contains the text 'include/ttak/sync/sync.h'. Two blue arrows originate from the bottom edge of this box. The left arrow points to a light gray box labeled 'pthread.h', and the right arrow points to a light gray box labeled 'stdint.h'. This visualizes that 'sync.h' includes both 'pthread.h' and 'stdint.h'.

pthread.h

stdint.h
